

The following three interdisciplinary PhD studentships for 2017 NITHM PhD Programme in Healthy Society are available:

1. Project Title: Sensing and Diagnostics: Development of a non-invasive hydrogel-based pulse signal detector (co-supervised by School of Materials Science & Engineering and Singapore General Hospital)

2. Project Title: Health Systems Complexity: DNA logic gates for health systems complexity (co-supervised by School of Physical and Mathematical Sciences and Singapore General Hospital)

3. Project Title: Health Systems Complexity: DNA-mediated clinical diagnosis system (co-supervised by School of Biological Science and Singapore General Hospital)

Dr. Jian-Jun SHU

Associate Professor

School of Mechanical & Aerospace Engineering

Nanyang Technological University

50 Nanyang Avenue

Singapore 639798
